Projects

1. AI-Based Stock Data Dashboard Prediction System

An AI-powered system that analyzes stock market data and predicts future trends using machine learning algorithms.

2. SVM and K-Means Algorithm Machine Learning Project

A machine learning project implementing SVM for classification and K-Means for clustering and data analysis.

3. E-commerce Churn Data Analysis

A data analytics project focused on identifying customer churn patterns and improving customer retention strategies.

4. Health Assist ChatBot

An AI chatbot designed to provide health-related assignment assistance and interactive educational support.

Education

Vivekanand College/ BCA with Specialization in Artificial Intelligence

June 2024 - PRESENT, Surat

Focused on Artificial Intelligence, Machine Learning, Data Science, and Web Development. Now I am in a 3-year BCA program with Specialization in AI, actively working on AI-based projects, machine learning models, and data related applications while developing strong programming and problem-solving skills. Also contributed to college activities by supporting college management tasks, assisting in academic coordination, and maintaining sincerity and discipline as a dedicated student representative.

Awards

🏆 Secured First Rank in Inter-College Competition “Bot Battles” using Python Programming at Vivekanand College, Surat.

🏆 Secured Second Rank in Inter-College Competition “Data Drill” using Python Programming at C.K. Pithawala College, Surat.
